

## ZEISS Sun Sport Lenses

Wrapped lenses for sport frames offer clear optics and protection from dust the nose to the temporal side.

For the 79% of consumers who wear sunglasses for outdoor activities, we can offer more than just UV protection. From leisure activities to performance sports, extreme light conditions outdoors means protecting lenses from the elements while ensuring amazing optics for wrapped frames to provide excellent dynamic vision.

[Functional Sport Tints](#)[ProGolf](#)[Contact](#)

## The active leisure look

Wrapped sunglasses are functional and stylish and provide protection from all sides against UV rays and the elements like wind, glare and water. For a touch of trendiness, add one of the four active DuraVision Mirrors:

- ✓ DuraVision Mirror Green
- ✓ DuraVision Mirror Red
- ✓ DuraVision Mirror Silver
- ✓ DuraVision Mirror Strong Blue

> [DuraVision Sun](#) anti-reflective on the inside of the lens provides the ultimate finish for even greater visual performance.

### Functional tints with something extra

For sports addicts the right gear is a must. And the right sunglasses are essential. Specific functional tints for Rx can help improve performance: Pro-Golf for golfing, Skypol fun for water sports and many more.

### The darkest tints for extreme conditions

We offer lenses with over 90% light absorption for extreme light conditions, such as on glaciers, to provide ultimate protection.

DuraVision Mirror Red

DuraVision Mirror Silver

DuraVision Mirror Strong Blue

Sweet Violet: Cycling – enhances image definition and enables the eye to spot potential dangers on the asphalt.

Spicy Red: Snow applications for low light conditions – cuts some blue light, improves contrast on the slopes.

Sunset Violet: Shooting – enables clear vision and dramatic contrast between the greenish background colors and the brown color of the moving target.

## The benefits for the wearer

- ✓ Reduced edge thickness with [Cosmetic Edge® Technology](#) for ZEISS Sport lenses.
- ✓ A stylish look with the DuraVision Mirror active colors
- ✓ Functional tints: for specific activities and for extreme light

## ProGolf

Golfers all have one thing in common: they want to strike the ball more precisely, improve their handicap and get more enjoyment from the game. As golf is an outdoor sport, golfers often find that glare from the sun impairs their game.

This is precisely the reason why glasses with ProGolf sunglass lenses should be part of any golfer's standard equipment.

### Optimum visibility in every situation

Unlike traditional sunglass lenses, ProGolf not only displays a darkening effect, but actually enhances the contrast of vision by a process of selective absorption. This means that, even with constant transitions between light and shadow during the game, the golfer enjoys optimum visibility and can see any unevenness or bumps in the course more clearly than with traditional sunglasses.

ProGolf is the combination of a contrast-enhancing tint and the high quality Super ET coating, making it the ideal sun protection for golfers.

## The benefits for the wearer

- ✓ Outstanding contrast enhancement in strong sunshine and glare
- ✓ 100% solar UV protection
- ✓ Power-independent light reduction
- ✓ Light plastic lens with high resistance to breakage
- ✓ No distracting reflections thanks to a high-quality AR coating
- ✓ Hard coating for optimum scratch resistance
